Packing Yard scene of the Fresno Nursery Company, at Fresno, California

Something About Our Business

From a small beginning in the year 1889 our present firm has increased its annual business from three thousand to one hundred thousand dollars' annual sales. Our growth has been steady from year to year, enjoying, as we do, the confidence of the people with whom we have dealt. It has always been our aim to do a fair and square business, with the result that we are patronized by not only the largest fruit growers in California and the West, but our reputation is recognized in many foreign countries. We have a large Mexican, South American and Australian trade. We also receive orders from every State in the Union, and with our expert packing methods assuring the safe arrival of nursery stock, our long distance business is increasing yearly.

Allowing for these facts it stands to reason that the commercial demand for high-grade nursery stock is world-wide, and that we are receiving our share of not only local, but outside business. The nursery stock grown by us after years of experience, possesses all the qualities calculated to meet the prevailing conditions of soil and climate, and the elements of strength which cause them to produce fruits commanding first place in the markets of the world.

Read Our Guarantee

IN GROWING AND FURNISHING ALL NURSERY STOCK WE USE THE GREATEST CARE TO HAVE IT TRUE TO NAME; AND WILL REPLACE ANY THAT MAY PROVE UNTRUE. BUT NO SALE BY US CARRIES A WARRANTY, EXPRESS OR IMPLIED, AND FOR ANY ERROR WE SHALL NOT BE LIABLE FOR MORE THAN THE PURCHASE PRICE. EVERY PURCHASE FROM US IS MADE ON THESE TERMS.

A Word of Thanks

We wish to extend our thanks to our many thousands of customers for their past patronage. It is always our aim to sell nothing but the best. Many of our customers prevailed on their neighbors to order from us and we take this opportunity of extending our thanks to them for their kindness. We always regard our customers as old friends, and they really are, and we hope to merit the same kindly assistance this year as we have for so many years past.

Our References

The best references we have are the thousands of people who have bought from us in the past. If you have bought from us you know we are reliable and do just as we agree; if not, however, ask any bank or business house in Fresno and Dinuba, California, and they will tell you we are reliable people to do business with. Best of all, send us your order and the goods will satisfy you.

Suggestions to Buyers

1. All orders should be plainly written on a separate sheet of paper and not mixed up in the body of the letter. This prevents confusion in booking orders.
2. When ordering please advise us if substitution will be permitted, as we feel at liberty when no instructions accompany the order to substitute other sorts equally as desirable. In cases where we substitute it is our general rule to send our patrons a better variety than the one ordered.
3. All our stock is well packed and carefully labeled. We make a small charge to cover cost of material used in packing. We make no charge for drayage.
4. Advise us plainly how you wish us to ship—by freight or express; also state the route; otherwise we will use our own judgment in forwarding.
5. After we deliver nursery stock to the carriers in good condition we cannot hold ourselves responsible for any loss or injury. All customers are requested to hold on to their shipping receipt, for in many instances it is necessary to file a claim with the railroad company and other carriers for damage or delay in transit, and the original shipping receipt is necessary when filing such claims.
6. All claims for mistakes in filling orders and also for all stock which may be unsatisfactory upon arrival must be reported to us within 10 days after receipt of shipment; otherwise we cannot allow same.
7. Parties unknown to us must accompany their orders with a remittance or furnish satisfactory references.
8. Please remember to write your name, postoffice, county, state, street address or rural route when ordering. This prevents your mail from going astray.
9. Remittances can be made us either by postoffice money order, registered letter, express money order or bank draft. Where parties have a bank account with their local bank we will accept their personal check in payment of any stock they may order providing, of course, they have ample funds in their local bank to meet payment upon presentation. Many times it is more convenient for our customers to send us a check on their local bank when ordering, for they may live a considerable distance from town and in remitting in this manner would make it unnecessary for them to go to town for this purpose.
10. Our descriptions of the various fruits and plants we list in this catalog are very much condensed, as space will not permit us to go into detail telling the qualifications of the various varieties. We would therefore recommend to all those who intend to embark in fruit growing, to procure a copy of the following well-known works:
 - CALIFORNIA FRUITS AND HOW TO GROW THEM. By Prof. E. J. Wickson. This book covers every phase of fruit growing in detail. Describes varieties in full and is a complete compendium of methods and suggestions on soil preparation, planting, cultivating, irrigating and pruning. We can supply this book, postpaid, \$3 per copy.
 - GRAPE GROWING AND WINE MAKING IN AMERICA. By Prof. G. Hussman. This work gives instructions in vineyard management from planting to harvesting, both East and West, especially on California grape growing, wine making, etc. Price \$2 per copy.

Planting Instructions

1. It is of great importance in the first place to put your land in good condition to receive your trees. The ground should be thoroughly plowed and followed by harrowing until the soil is well pulverized. Stake off the distance you intend to plant your trees apart; for this purpose it is best to use a planting chain; if no regular planting chain can be procured from the hardware dealers anyone can make their own planting chain with wire. One hundred feet of wire will answer every purpose, and the designing mark can be made by soldering buttons on the wire at whatever distance you wish to plant your stock apart.

2. As soon as the trees are received, remove from the bales or boxes, and heel them in the ground, thoroughly settling with water. This will insure the stock keeping in first-class condition until ready to plant. When planting, see that the holes are dug sufficiently large to admit the roots in natural form. All bruised or broken roots should be cut away to a smooth surface with a sharp knife. The tree should stand just a trifle deeper than it did in the nursery row. It is also very important after planting an orchard to settle the earth around the roots by liberal application of water. The cause of trees failing to start in many instances is due to failure to settle the soil around the roots.

4. All deciduous fruit trees should be cut back to within 18 inches from the top of the ground. Instead of removing all the lateral limbs when topping the tree, a sufficient number of these laterals should be left to form a head. Shorten in the laterals to within two inches of the body of the tree. The trees as a general rule have limbs removed while standing in the nursery rows to within 12 inches of the ground. It is always a good plan not to remove the lateral limbs entirely, so that in case the buds on the main body of the tree do not start in the spring, the buds on the smaller branches will.

" 35 " " " " " "	35	40	
" 40 " " " " " "	27	31	
" 50 " " " " " "	18	20	

Rule—Square Method—Multiply the distance in feet between the rows by the distance the plants are apart in the rows, and the product will be the number of square feet for each plant or hill, which, divided into the number of feet in an acre (43,560), will give the number of plants or trees to the acre.

Rule—Equilateral Triangle Method—Divide the number required to the acre "square method" by the decimal .866. The result will be the number of plants required to the acre by this method.

UNIVERSITY OF CALIFORNIA
COLLEGE OF AGRICULTURE
AGRICULTURAL EXPERIMENT STATION

BENJ. IDE WHEELER, PRESIDENT
E. J. WICKSON, DEAN AND DIRECTOR

BERKELEY May 28, 1912.

Fresno Nursery Company,

Fresno, Cal.

Gentlemen:

It gives me pleasure to say that I have been personally acquainted with Mr. F. H. Wilson, president of your company, and Mr. Chas. A. Chambers, secretary thereof for many years; also in a general way with the business which your company has been doing for the promotion of fruit growing in California. Such personal acquaintance with the men conducting your enterprise and general knowledge of its good repute justify me in commending your work as up-to-date, enterprising and praiseworthy.

Very sincerely,

E. J. Wickson

Our One-Year-Old Pear Trees, showing Robust Growth.

Quality and Service

No establishment exercises greater care in growing nursery stock than we do; as an evidence of that fact we show on this page pear trees in our nursery rows, which speak for themselves. Care in growing and a superb soil and climate are the factors that give quality to all the stock produced by us. Making a specialty of fruit trees, we claim for our stock absolute reliability and a vigor that is indeed hard to surpass. Our peach and apricot, fig and olive, grapes and small fruits, forest trees and ornamentals show quality "from the roots up."

The Standard Ornamentals.

DECIDUOUS SHADE TREES

<i>Albizia Julibrissin</i>	Each	10	<i>Filbert</i> (Purple Leaved) 3 to 4 ft.	.75

To Our Patrons:

If parties have not received a copy of our 40-page Descriptive Catalog, write us for same and it will be mailed promptly. Send us an exact list of your requirements if you are in the market for a large amount of Nursery Stock, as prices fluctuate from time to time and very often we can make special quotations on large orders.

In case we do not list any varieties you want, write us, for we can easily obtain odd varieties called for from other concerns we are in close touch with.

Address all communications to the firm direct.

THE FRESNO NURSERY CO., Inc.

P. O. Box 615, Fresno, California.

Tree Protectors

For best results when planting an orchard we would recommend the use of tree protectors to protect the bodies of the trees from sunburn, also from rabbits and other small animals that prey on and injure young nursery stock. The most valuable protector on the market is made from the Yucca Palm. They are easily put on and are porous, allowing a free circulation of air, at the same time affording every protection. We can supply these protectors in any quantity. Write us for prices.

Certificate of Inspection

Our nurseries are inspected several times each year by the local Horticultural Commissioner, under the direction of the State Commission of Horticulture and Entomology. Every shipment we make is accompanied with a tag of inspection. Aside from this we exercise every care to have our stock free from disease and insect pests.

OFFICE OF HORTICULTURAL COMMISSIONER,
Fresno, Fresno County, California

TO WHOM IT MAY CONCERN:

As Horticultural Inspector of Fresno County, I have always found the Fresno Nursery Co. not only reliable, but the members of this firm exercise every care to have their stock free from disease. Indeed, they would not send out a tree, vine or plant knowing it to be affected in any way. I am assured that all nursery stock sent out they would not hesitate to plant themselves.

F. C. SCHELL,

HORTICULTURAL INSPECTOR FRESNO COUNTY, CAL.

Weights of Nursery Stock

The general run of deciduous fruit trees, either in bales or cases, average about as follows: 4/6 ft. size, 1½ pounds each; 3/4 ft. size, 1 pound each; 2/3 ft., ½ pound each; grape vines, 1-3 of a pound each.

Citrus trees, balled, packed in boxes, 40 pounds each, and with naked roots, 3 pounds each. Balled palms and other ornamental trees, where the stock is taken up with a ball of earth on roots, average 40 pounds each. Grape cuttings, 14 to 16 inches long, 90 pounds to the thousand cuttings. Eucalyptus trees in flats, 100 plants to the flat, weigh 50 pounds per flat. The weights given above include the weight of packing material used in packing stock for shipment.

In order to determine the approximate freight charges on a shipment, patrons can ascertain freight rates from their local agent from Fresno to their destination (rate per 100 lbs.) and in this way can figure about the cost for transportation charges.

In less than carload lots we make a small charge to cover cost of material used in packing. Where parties order a carload of stock we make no charge for packing. In shipping carloads we pack stock in the cars, which requires no boxing. Sufficient straw and shingle tow is used to keep stock in good condition. Our packing methods are perfect and we exercise every care to protect the interests of our patrons, being anxious to please them in order to merit their future patronage.

Special quotations on large orders

When you are in the market for a large amount of stock we would be pleased to have you send us an exact list of your wants for quotations. We will cheerfully furnish estimates on large orders and give intending buyers every information in our power regarding the best variety to plant and other data in detail.

A Word of Caution

Address all orders and make all remittances payable to the firm direct. Pay no money to agents who claim to represent us unless they show a letter of authority. All of our agents carry with them a certificate of agency, and when placing orders with traveling solicitors be sure, if they claim to represent us, to have them show you our authority.

To Prospective Buyers:

Our Complete Price List will be issued about October 1st. If you are in the market for Nursery Stock the coming season kindly send us an exact list of your wants and we will advise you of the cost of your order.

As a special inducement for our patrons to send in their orders early, where customers order 100 Fruit Trees and 300 Grape Vines of any ONE VARIETY, we will give them the benefit of the 1000 Rate in Price List where the thousand rates are quoted. In many instances we can make special quotations if we know exactly what you will need. Give us an opportunity of figuring on your wants.

The Price List sent you herewith is our Advance Price List, to give you some idea of the probable cost of stock. If you do not receive our Complete Price List in October, write for it. All questions regarding varieties, soil conditions, care and cultivation of Nursery Stock cheerfully answered. Make known your wants, we do the rest.

Yours for "*Reliable Nursery Stock
from the Roots Up*"

THE FRESNO NURSERY CO., Inc.

P. O. BOX 615

FRESNO, CALIF.

To the Intending Planter:

The first cost of a tree, grape vine or plant cuts little figure if you get what you buy — but they are dear at any price if the stock proves untrue. Buy your stock from a reliable firm. Thousands of our patrons all over the West will tell you we are reliable —

*The Fresno
NURSERY CO. INC.*
